

ATOM-JET TWIN BAND SERIES OF OPENERS

C-SHANK TWIN BAND

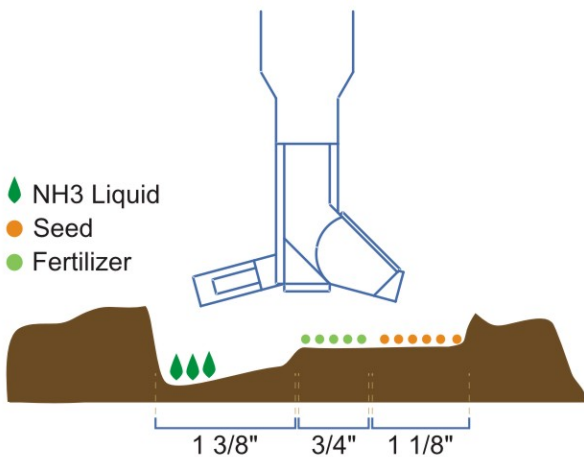

- Versatile (Can be used for NH₃ & Liquid)
- Non-Freeze technology
- Excellent Seed-NH₃ separation
- Same plane placement

DESCRIPTION

Twin bands provide a cost-effective and trustworthy solution to mid-row fertilization. Twin bands offer a safe seed and fertilizer separation at higher rates by applying NH₃ to the side and seed to the opposite side with the opportunity to put fertilizer down the middle. Inspired design allows the one-pass grower to achieve application of up to four products using variable rate technology.

SPECIFICATIONS

Part#	CCHTF0 – Left CCHTG0 – Right
