

ATOM-JET TWIN BAND SERIES OF OPENERS

CNH TWIN BAND

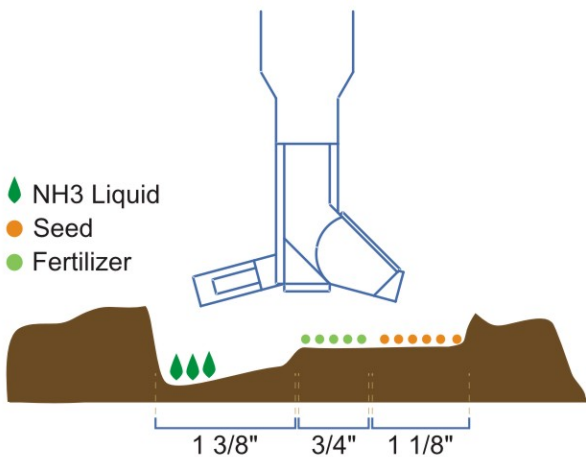

- Versatile (Can be used for NH₃ & Liquid)
- Non-Freeze technology
- Excellent Seed-NH₃ separation
- Same plane placement

DESCRIPTION

Twin bands provide a cost-effective and trustworthy solution to mid-row fertilization. Twin bands offer a safe seed and fertilizer separation at higher rates by applying NH₃ to the side and seed to the opposite side with the opportunity to put fertilizer down the middle. Inspired design allows the one-pass grower to achieve application of up to four products using variable rate technology.

SPECIFICATIONS

| | |
|-----------------|---|
| Part# | CBHTF0 – Left CBHTG0 – Right |
| Opener Type | Triple Shoot (NH₃, Granular Fertilizer, Seed) |
| Shank Type | CIH800, NHP2070 |
| Shank Spacing | 9"-12" |
| Packer Widths | 3.5-5" |
| Fertilizer Type | Granular & NH₃ or Liquid |
| Seed Tube | 1.25" OD |
| Fertilizer Tube | 1.25" OD |
| NH ₃ | 3/8" or 1/2" tube |
