

ATOM-JET CNH PRECISION HOE SERIES OF OPENERS

CNH TWIN BAND

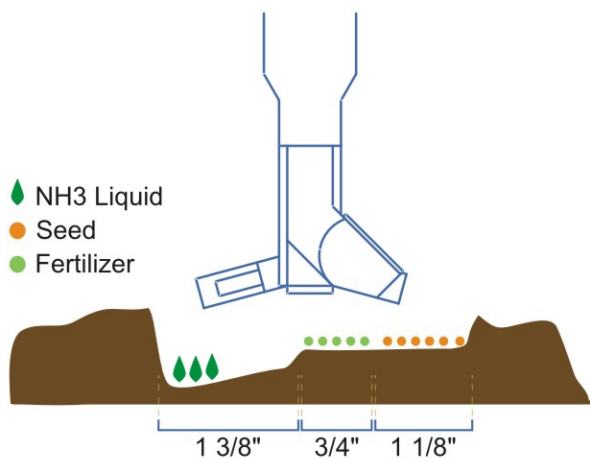

- Versatile (Can be used for NH3 & Liquid)
- Non-Freeze technology
- Excellent Seed-NH3 separation
- Same plane placement

DESCRIPTION

Twin bands provide a cost-effective and trustworthy solution to mid-row fertilization. Twin bands offer a safe seed and fertilizer separation at higher rates by applying NH3 to the side and seed to the opposite side with the opportunity to put fertilizer down the middle. Inspired design allows the one-pass grower to achieve application of up to four products using variable rate technology.

SPECIFICATIONS

Part#	CBHTF0 – Left CBHTG0 – Right
Opener Type	Triple Shoot (NH3, Granular Fertilizer, Seed)
Shank Type	CIH800, NHP2070
Shank Spacing	10"-12"
Packer Widths	4.8"
Fertilizer Type	Granular & NH3 or Liquid
Seed Tube	1.25" OD
Fertilizer Tube	1.25" OD
NH3	3/8" or 1/2" tube

* Measurements may vary with soil conditions and ground speed.
