

ATOM-JET MORRIS CONTOUR SERIES OF OPENERS

MORRIS CONTOUR PAIRED ROW LIQUID

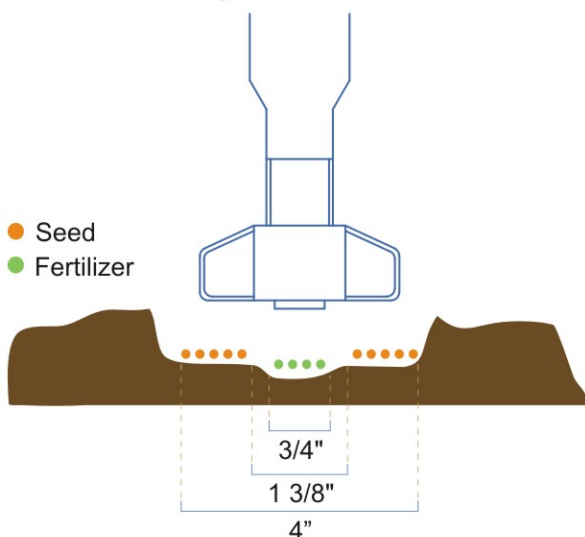

- Double Shoot Technology
- Same Plane seed-Fertilizer Placement
- Full Carbide on point and wings
- Maintainable/Repairable
- Even Germination

DESCRIPTION

The paired row liquid provides a firm even seedbed for the seed. The fertilizer and seed are left on a firm bed all on the same plane. This prevents the seed from burning by rolling into the fertilizer trench. The paired row will give you two distinct seed rows with the fertilizer down the center. This opener can be used for wider row spacing machines with a 4.5" or wider packer for greater seed bed utilization. The hardsurface on the top of the wings and the sides provide longer wear than a flat surface. The point and the front of the wings are fully carbided.

SPECIFICATIONS

Part#	CADTDM – 3" CAETEM – 4"
Opener Type	Double Shoot Paired Row Liquid
Shank Type	Morris Contour I & II
Shank Spacing	9"-12"
Packer Widths	3.5-5"
Fertilizer Type	Liquid
Seed Tube	1.25 "OD
Fertilizer Tube	0.250"

* Measurements may vary with soil conditions and ground speed.
