

# ATOM-JET MORRIS CONTOUR SERIES OF OPENERS

## MORRIS CONTOUR SIDE BAND GRANULAR

- Double Shoot Technology
- Large Seed Gallery
- Same Plane Seed-Fertilizer Placement
- Fully Carbided on point and wing
- Starter Phos Compatible

### DESCRIPTION

The side band granular opener allows for precise placement of granular fertilizer out the carbide wing of the opener. The seed is dropped down the center behind the 3/4" or 1" carbided point. This allows for separation between the seed and fertilizer. There is also the option of seed out the side and fertilizer down the center. There are left and right openers as the wings are to point to the center of the drill to help eliminate plugging. A 1" point will have a 1 1/4" wing and a 3/4" point will have a 1 1/2" wing.

### SPECIFICATIONS
